

HARIBO UK – Dunhills (Pontefract) Plc Procurement Policy

KIDS AND GROWN-UPS LOVE IT SO, THE HAPPY WORLD OF HARIBO

As a responsible manufacturer, HARIBO UK recognises the importance of making decisions for the long-term to ensure happiness now and for future generations.

Therefore, we strive to procure all goods and services in a responsible and sustainable manner.

We take into consideration the social, economic, environmental, food safety and quality issues as well as health and safety at every stage of our supply chain. This includes, taking into account the life cycle of all procured goods ensuring that environmental concerns are considered in any decisions we make.

Together with our suppliers, we create a proactive, sustainable approach to procurement, leading to committed, long-lasting partnerships. All our suppliers comply with the relevant laws and regulations, and suppliers who go above and beyond their legal compliance will be given our preference. Sustainable development and improvement are at the centre of our operation.

We work closely with our suppliers, customers, internal stakeholders and sector organisations to ensure that our consumers get quality products at good value for money whilst receiving a great service.

We always aim to explore ways of improving our processes and update our policy to reflect our continuous progress.

This policy is reviewed and updated annually.
